SUMMARY

Experienced Full Stack Developer with 2+ years in ReactJS and NextJS, with familiarity in NodeJS. Skilled in building scalable applications, responsive UI design, and enhancing user experience using Material UI & TailwindCSS. Hands-on client-site exposure at client locations, collaborating with stakeholders to deliver tailored solutions.

EXPERIENCE

Software Developer

Engineer Master Solutions Pvt. Ltd.

August 2024 - Present, Indore

- Gained hands-on client-site experience by working directly at the client's office, ensuring seamless project execution and effective communication.
- Skilled in developing and implementing innovative solutions to drive successful results while aligning with client requirements and expectations.
- Collaborated with a team to implement proven development techniques, improving project outcomes.

Junior Software Developer

Hiteshi Infotech

April 2023 - August 2024, Indore

- Junior Software Developer specializing in the MERN Stack, dedicated to building scalable and efficient web applications.
- Passionate about crafting seamless user experiences through clean, maintainable code and innovative front-end solutions.
- Oversaw various stages of web development, ensuring smooth execution, performance optimization, and successful project delivery.

SKILLS

HTML/CSS, JavaScript, ReactJS, Redux/Redux-toolkit, NextJS, NodeJS, ExpressJS, MongoDB, SQL, AWS(EC2, S3, API Gateway), FireBase, Redis, Socket.io, Material UI, TailwindCSS, Postman, Git/GitHub, Jira, Bitbucket

PROJECT

Febi.ai

[febi.ai](#)

- **Technology Used:** ReactJS, Redux, TypeScript, ExpressJS, MySQL, Socket.io, Material UI, AWS, BitBucket. **|| Role:** Full Stack Developer.
- Worked on-site at the client's office, collaborating closely with stakeholders to understand business needs and deliver tailored solutions.
- Developed the inventory management system for vendors, building both the frontend and backend to enable real-time stock tracking using Socket.
- Created an automated email reminder service using cron jobs, sending due payment notifications after a 7-day gap.
- Implemented a customizable email template system with Quill.js, allowing users to create personalized email designs tag management.
- Built a custom invoice management feature, enabling vendors to modify and personalize invoice details based on their business needs.
- Implemented the project using Micro Frontend & Microservices Architecture, enabling modular, scalable, and independent feature development.

Spaarkd

[www.spaarkd.com/](#)

- **Technology Used:** Next.js, TypeScript, Supabase, TailwindCSS, Framer Motion, Zod, GitHub. **|| Role:** Front-End Developer.
- Developed the Spaarkd platform, enabling users to create wardrobes or brands, streamlining the process from concept to product.
- Designed a responsive and visually appealing interface using Next.js and TailwindCSS, ensuring smooth and intuitive user navigation.
- Integrated Supabase for real-time data interactions, enhancing catalog browsing and enabling seamless design workflows.
- Implemented Framer Motion to add smooth animations and interactive elements, improving user engagement and experience.
- Utilized Zod for form validation, ensuring data integrity and seamless error handling across the application.
- Contributed to catalog-based design selection and product customization, enabling a seamless and creative brand-building experience.

Orisha School Management Application

- **Technology Used:-** Nextjs, TypeScript, MongoDB, ExpressJS, Mantine UI,Github. **|| Role:-** Full Stack Developer.
- Spearheaded the development of the Orisha School Management application, powered by Hitachi MGRM, to enhance administrative efficiency.
- Designed a user-friendly interface with NextJS, ensuring smooth navigation and an intuitive experience for end-users.
- Utilized APEX charts to display complex state survey data, enabling dynamic filtering for better insights and analysis.
- Integrated Mantine UI for an appealing design while implementing custom validations to maintain data integrity, alongside drag-and-drop functionality for multiple fields and dynamic sections.
- Collaborated with the back-end team using expressJS to deliver a comprehensive solution that optimized management workflows and processes.

EDUCATION

Master of Science (Computer Science)

Sarvepalli Radhakrishnan University • Bhopal • 2020

Bachelors of Computer Applications

Bhola Bhai Patel College of Computer Studies • Gandhinagar • 2017
